01 Daily update

Plan, wrap up, post to Slack

Your morning plan and evening wrap-up, opened from the Daily update icon in the page tools and posted to the daily work update group on Slack. The page lists your last 30 days.

Every data point

DATA POINT	WHAT IT SHOWS AND HOW TO USE IT
Plan your day	Open it from the Daily update icon in the dock: what carries over from your last plan (still pending or WIP), your overdue and due-today tasks, upcoming ones you can take on early, and those with no deadline (plan one and its deadline is set to today when you post). Change any task right in its row (stage, status, tags…), keep, remove or add, write a note and post it to the daily work update group on Slack. You can open it all day to see and change your plan.
Wrap up your day	In the evening from the same icon, or when you sign out, your plan comes back with each task Pending, WIP, Done or On hold (from its stage). Report one as Done to complete it in Bitrix24, add tasks you finished ahead, and work outside the plan becomes a Bitrix24 task assigned to you. Then it goes to the same Slack thread.
My last 30 days	Each day you posted: tasks planned, done, WIP and outside the plan. Open the Daily update any time from its icon in the dock on the right.
