Contents

01 **On every page** — The parts every page shares

02 **Development** — Tasks, issues and deadlines

03 **QA** — Bugs, feedback, testing and retesting

04 **Insights** — What is holding us back

05 **Definitions** — The rules behind the numbers

01 On every page

The parts every page shares

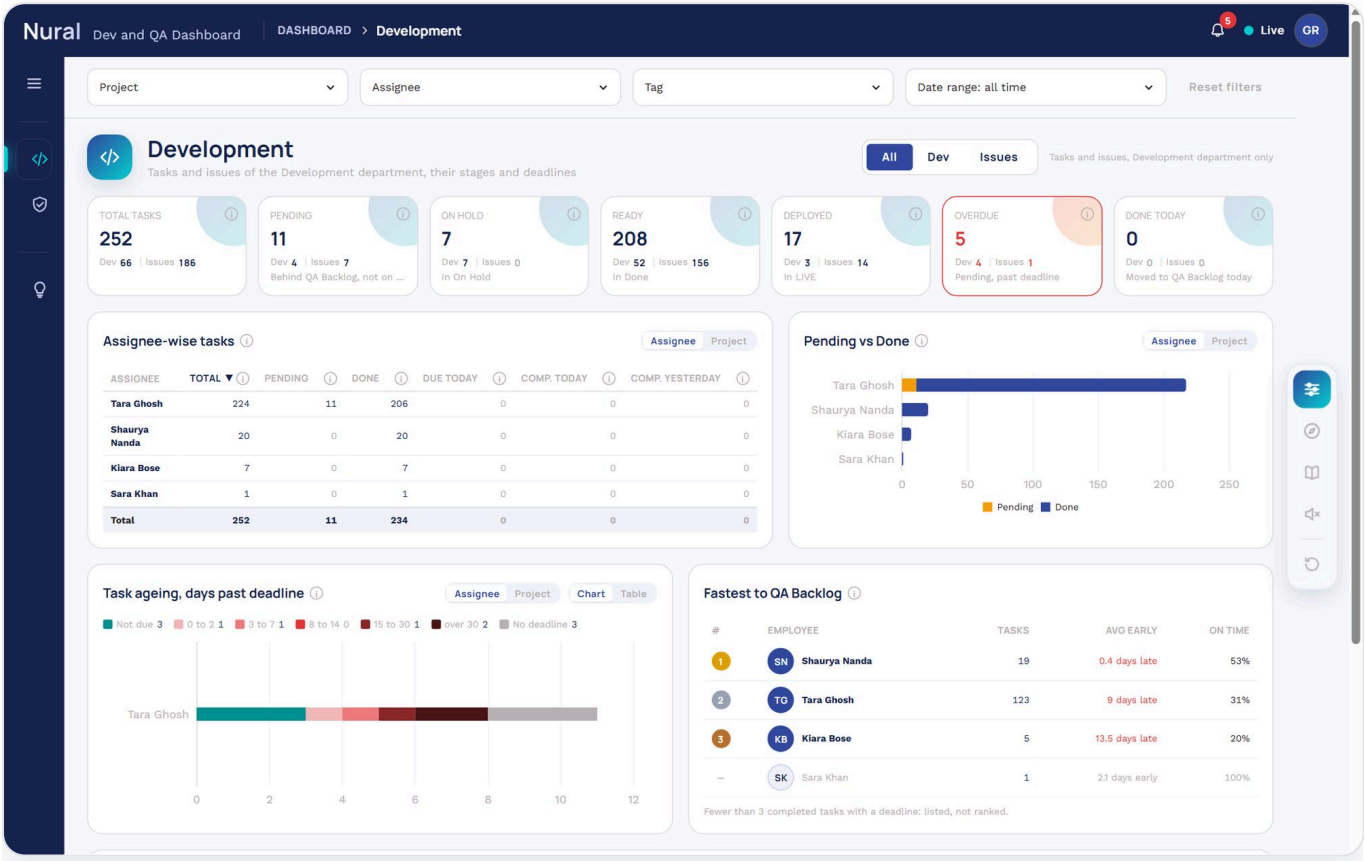

PART	WHAT IT DOES
The menu	Every page is here: the dashboard tabs and, for managers, the Employee module. Hover the icons to open it; click ☰ to pin it open, and again to unpin.
Filters	Project, assignee, tag and date range narrow every number on the tab, within your own tasks. The "i" icons say exactly what each number counts.
Alerts	The bell counts overdue tasks and tasks stuck over 5 days in one stage. Click it for the list and jump to the tasks.
Live	Live means changes in Bitrix24 reach the dashboard within seconds; numbers refresh by themselves. Offline means the connection dropped and it is reconnecting.
Page tools	On the right: Customise (choose the tiles and cards to show), the guided tour of this page, the PDF guides, reading tours aloud, and resetting the layout. Hover any icon for its name. Each data point also has a small toolbar on hover: ⠿ to move it, ? to explain it, the eye to hide it.
Your profile	Your name and role, the theme (Light, Dark, System), live-update toasts, Reset layout, this tour (replay, voice on or off) and Sign out. You are signed out 3 days after signing in.

02 Development

Tasks, issues and deadlines

The Development department's tasks and issues. The All / Dev / Issues switch at the top steers every number.

> Every number on this page counts **only your own tasks**: assigned to you or created by you.

Development, as you see it (names replaced).

Every data point

DATA POINT	WHAT IT SHOWS AND HOW TO USE IT
All, Dev or Issues	Development department only. Dev = development tasks, Issues = bugs and feedback, All = both. Every number on this tab follows this switch.
Total	Your tasks (assigned to you or created by you) for the switch. Click any count to list those tasks below.
Pending	Behind QA Backlog and not on hold: To do, In progress, Pushed to Master, Merged to Development, Pending for QA, Issue Raised. Click any count to list those tasks below.
On hold	In On Hold: neither pending nor completed. Pending + completed + on hold = total.

Ready to deploy	In the Done stage, ready to go live. Then Deployed: in the LIVE stage.
Overdue	Pending, not On Hold, and the deadline has passed. The first number to act on each day.
Done today	Reached QA Backlog for the first time today (IST).
Per person or project	Per person or project. Done = sent to QA (QA Backlog to LIVE). Comp. today = reached QA Backlog today. Switch Assignee / Project at the top. Every count opens its tasks. Click the title to focus it in the centre; drag ⠿ at the top to move it.
Pending vs Done	Pending vs completed (QA Backlog, In QA, Done, LIVE) per person or project, top 15 by total. Tooltip splits Dev / Issues (Bug / Feedback on Issues). Click a bar to open those tasks.
Task ageing	Open tasks by days past deadline. On Hold counts here but not as Overdue. The darker the red, the later. Chart or Table at the top.
On-time ranking	Tasks sent to QA with a deadline. Ranked by on-time %, then average days early. Fewer than 3: not ranked.
Tasks by stage	Tasks per Kanban stage; the colour bar shows each stage total. The red part of a cell is overdue. Click a cell for those tasks.
Task lists	Due today, Overdue, All tasks and Alert details open here. Clicking any number above opens All tasks narrowed to it. In a list you can change stage, status and tags of your tasks, tick rows for bulk edit, and export to Excel.

Task lists

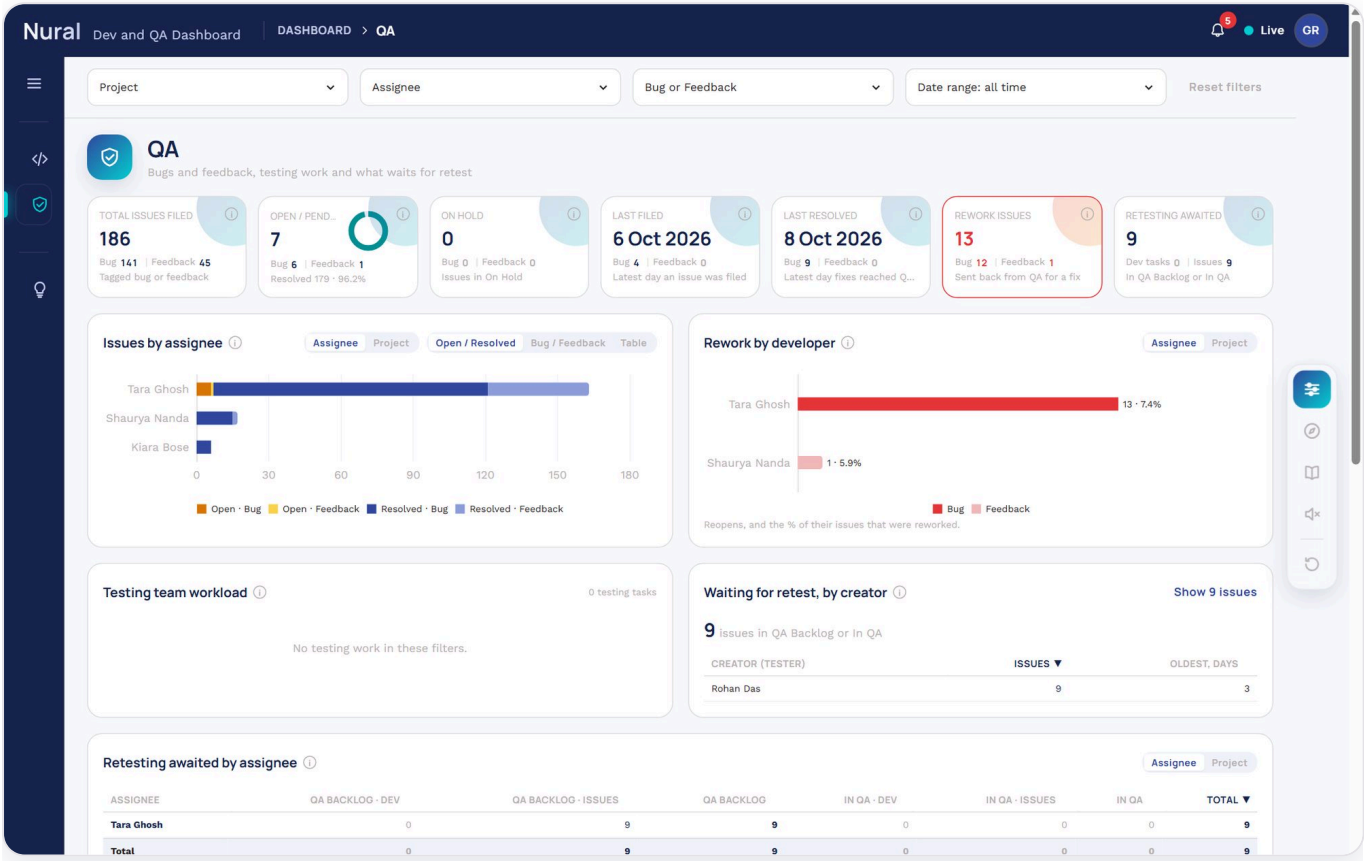

Due today, Overdue, All tasks (follows the last number you clicked) and Alert details. Each list sorts, edits in place, bulk edits, pages and exports to Excel.

03 QA

Bugs, feedback, testing and retesting

Bugs and feedback (tasks tagged bug or feedback), testing work and the retest queue. The Bug or Feedback filter narrows the page.

> Every number on this page counts **only your own tasks**: assigned to you or created by you.

QA, as you see it (names replaced).

Every data point

DATA POINT	WHAT IT SHOWS AND HOW TO USE IT
Issues filed	Bugs and feedback assigned to you or filed by you. Click any count to list those tasks below.
Open / pending	Open = pending: any stage behind QA Backlog except On Hold (Issue Raised included). Resolved = QA Backlog, In QA, Done or LIVE. On Hold is its own tile. The ring shows the resolved %.
On hold	In On Hold: neither pending nor completed. Pending + completed + on hold = total.

Last filed and resolved	Latest day an issue was created, and how many that day. Next to it, Last resolved: Latest day issues were pushed to QA Backlog (a fix handed to QA), and how many that day.
Rework	Issues QA sent back after testing: from QA Backlog, In QA or Done to Issue Raised, To do or In progress. Stage flow only.
Retesting awaited	Every task waiting for QA: in QA Backlog or In QA, split into dev tasks and issues (bug or feedback). The QA team's queue.
Issues by person	Open vs resolved, each split into bug and feedback (or the reverse), per person or project. Table: the assignee-wise table. Click the title to focus it in the centre; drag ⠿ at the top to move it.
Rework by developer	QA send-backs per person or project, split into bug and feedback, and the % of their issues sent back. First Issue Raised to To do is not counted.
Testing tasks	Tasks tagged testing or re-testing, or assigned to QA Testing. Late = pending past deadline.
Waiting for retest	Issues in QA Backlog or In QA, by who filed them. Oldest = days waiting.
Retest queue by person	Tasks and issues in QA Backlog and In QA per assignee or project. Every number opens its tasks.
Issue trend	Last 7 days (IST): bugs and feedback filed (created, light) and resolved (pushed to QA Backlog that day, dark). Pick one assignee or project, or see all. Click a point for that day's issues.
Issue ageing	Open issues by days past deadline (same as task ageing). On Hold counts here.
Issues by stage	Issues per stage and person (or project). Red = overdue part. Bug / Feedback narrows it.
Issue lists	Latest filed, Latest resolved and All issues. Any number above opens All issues narrowed to it. Edit in place, bulk edit and Excel export work as on Development.

Issue lists

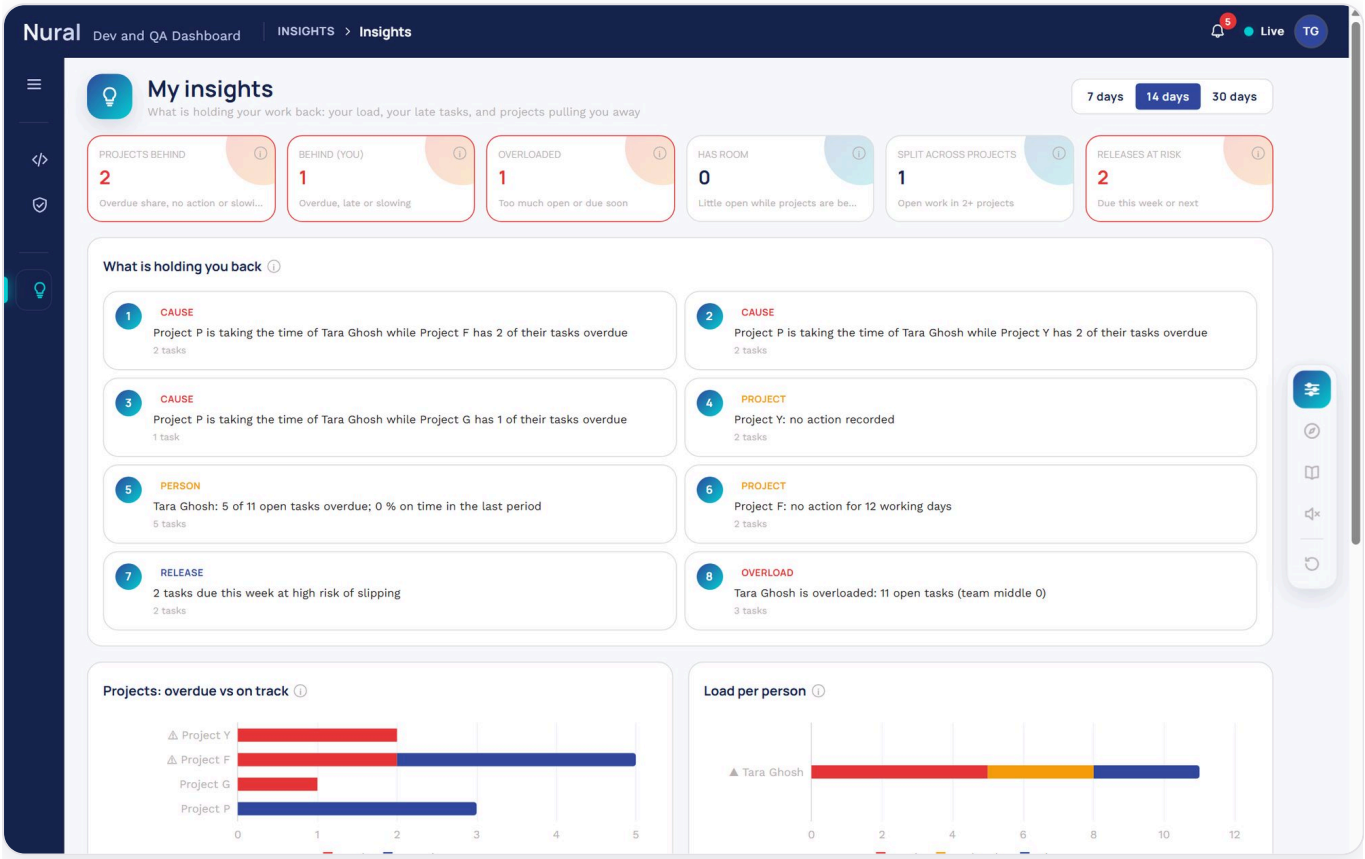

Latest filed, Latest resolved and All issues (follows the last number you clicked), with the same editing and export as on Development.

04 Insights

What is holding us back

Findings from Bitrix24 and dashboard data, ranked: causes first (projects pulling people away), then releases at risk, lagging projects, overload, lagging people and people with room. Period: 7, 14 or 30 days. Every finding opens its tasks.

> Every number on this page counts **only your own tasks**: assigned to you or created by you.

Insights, as you see it (names replaced).

Every data point

DATA POINT	WHAT IT SHOWS AND HOW TO USE IT
Insights	What is holding your work back: your load, your late tasks, and projects pulling you away from others. Choose how far back to look: 7, 14 or 30 days.
At a glance	Lagging projects and people, the overloaded, those with room to help, people split across projects and releases at risk. Click a tile for its tasks.
What is holding us back	Your findings ranked, causes first: a project taking your time while your tasks in another go overdue, then your late work and releases at risk. Click one for its tasks.

Projects	Open tasks per project with the overdue part; ⚠ marks a lagging project. Hover for why; click for the tasks.
Load	Open tasks per person: overdue, due in the next 5 working days and the rest. ▲ overloaded, ▽ has room to take tasks over.
Projects pulling people away	Who has open work in several projects, how much they do in each, and which project is taking their time while another goes overdue.
Release plan	Tasks due this week and next with their planned date, stage and risk of slipping. Click a row for the task.
Leave and attendance	From Infowan once connected: leave, late arrivals and early leaving, and the tasks and projects they put at risk. Until then insights use Bitrix24 data.

The rules

FINDING	RULE
Lagging project	3+ overdue and 25 % or more of its open tasks; or no action for 10+ working days; or closing half or less of the period before.
Lagging person	3+ overdue and 30 % or more of their open tasks; or under 50 % on time; or closing half or less of the period before with 5+ open.
Overloaded	10+ open and twice the team median, or 8+ due in the next 5 working days.
Has room	2 or fewer open and closed while one of their projects has overdue work.
Pulling people away	One project takes 70 % or more of a person's actions while their tasks in another project are overdue.
Release risk	Open tasks due this week or next: high if overdue, or not started and due within 2 working days.

05

Definitions

The rules behind the numbers

TERM	RULE
Pending	Behind QA Backlog and not on hold: To do, In progress, Pushed to Master, Merged to Development, Pending for QA, Issue Raised.
On hold	In On Hold: neither pending nor completed. Pending + completed + on hold = total.
Completed (done)	Completed: in QA Backlog, In QA, Done or LIVE.
Overdue	Pending, not On Hold, and the deadline has passed.
Done today	Reached QA Backlog for the first time today (IST).
Due today	Deadline is today (IST), in any stage except LIVE.
Rework	Issues QA sent back after testing: from QA Backlog, In QA or Done to Issue Raised, To do or In progress. Stage flow only.
Retesting awaited	Every task waiting for QA: in QA Backlog or In QA, split into dev tasks and issues (bug or feedback).
