01 On every page

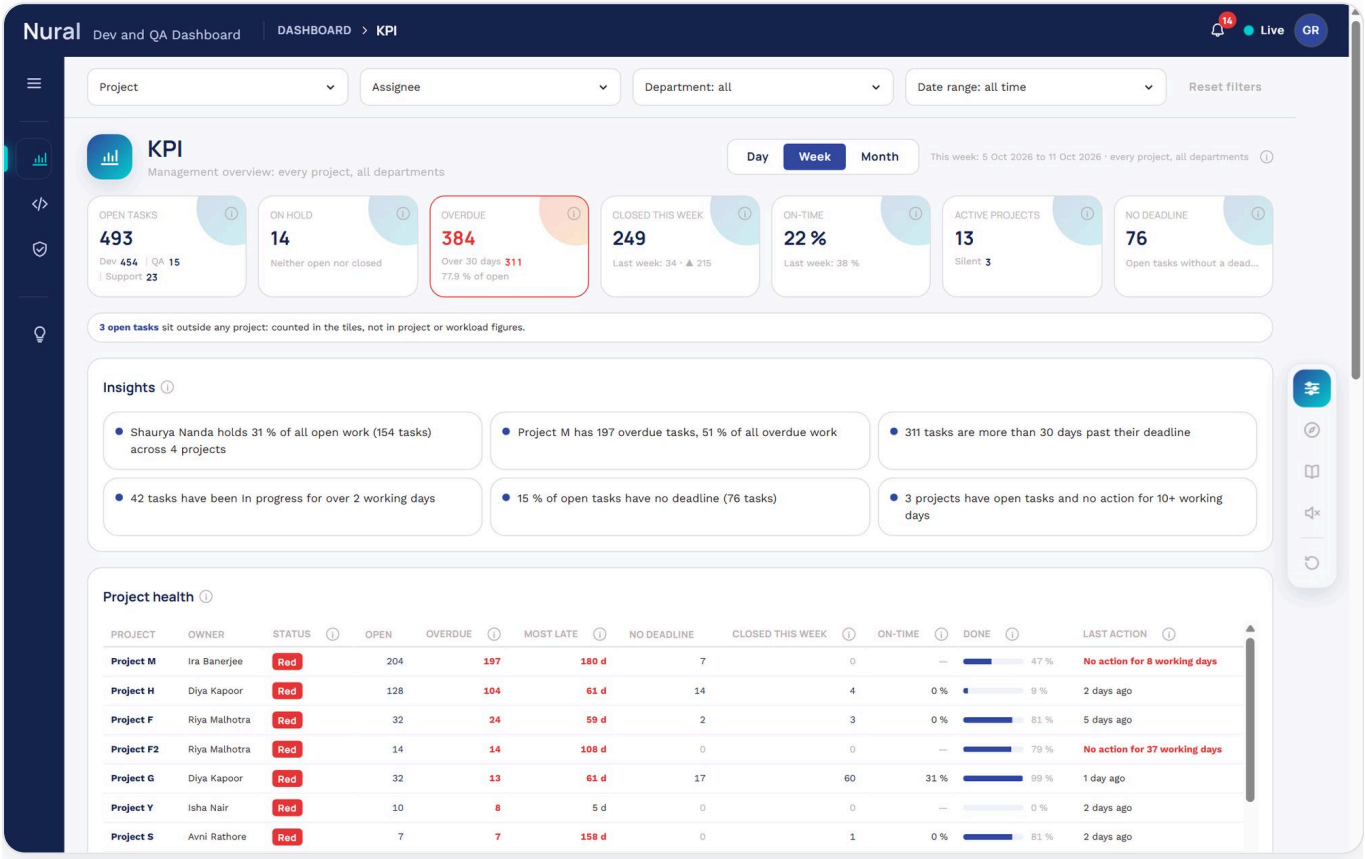

The parts every page shares

PART	WHAT IT DOES
The menu	Every page is here: the dashboard tabs and, for managers, the Employee module. Hover the icons to open it; click ☰ to pin it open, and again to unpin.
Filters	Project, assignee, tag and date range narrow every number on the tab. Reset filters clears them. The "i" icons say exactly what each number counts.
Alerts	The bell counts overdue tasks and tasks stuck over 5 days in one stage. Click it for the list and jump to the tasks.
Live	Live means changes in Bitrix24 reach the dashboard within seconds; numbers refresh by themselves. Offline means the connection dropped and it is reconnecting.
Page tools	On the right: Customise (choose the tiles and cards to show), the guided tour of this page, the PDF guides, reading tours aloud, and resetting the layout. Hover any icon for its name. Each data point also has a small toolbar on hover: ⠿ to move it, ? to explain it, the eye to hide it.
Your profile	Your name and role, the theme (Light, Dark, System), live-update toasts, Reset layout, this tour (replay, voice on or off) and Sign out. You are signed out 3 days after signing in.

02 KPI

Management overview

The management overview of every project and department. Period: Day, Week or Month; "closed" and "on-time" compare with the period before.

KPI, as you see it (names replaced).

Every data point

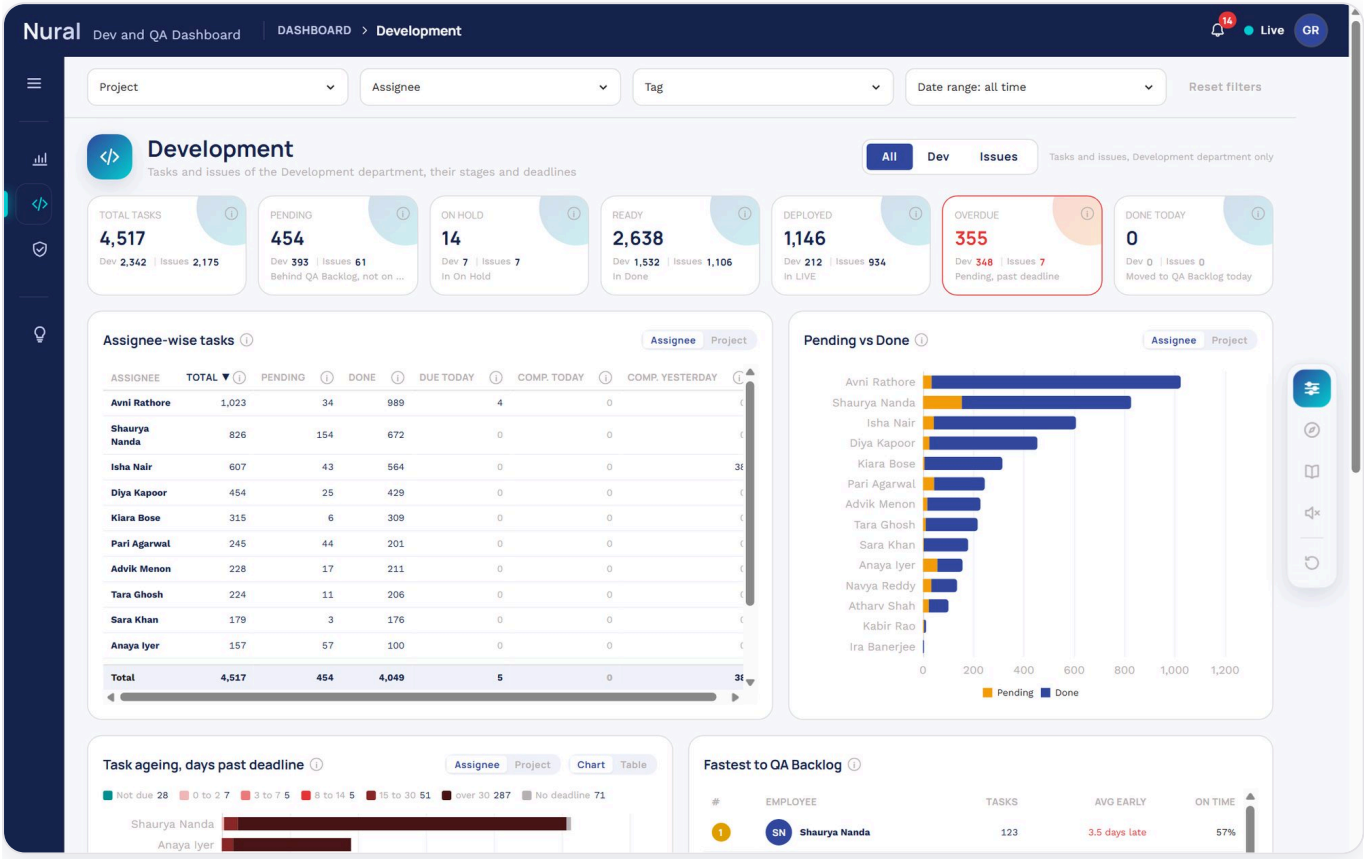

DATA POINT	WHAT IT SHOWS AND HOW TO USE IT
Day, Week or Month	The period for closed, on-time and the people table, compared with the period before. Every task in every project, all departments. A task is closed when it first reaches QA Backlog (or, without QA stages, when Bitrix24 closes it).
Open tasks	Pending tasks: behind QA Backlog and not on hold. Department = the assignee’s department. Click any count to list those tasks below.
Overdue	Open tasks whose deadline has passed. "Over 30 days" = more than 30 days late.
Closed	Tasks closed in the period (first QA Backlog, else the Bitrix24 closed date). Clean-ups of 30+ tasks closed in one project on one day are left out.

On-time	Of the tasks closed in the period that had a deadline, the share closed on or before it.
Active projects	Projects with open tasks and any action (task change or comment) in the last 30 days. Silent = open tasks and no action for 10+ working days.
No deadline	Open tasks without a deadline: they cannot be overdue or planned.
Insights	Findings worked out from the same numbers. Click one to see its tasks. Start here each morning. Click the title to focus it in the centre; drag ⠿ at the top to move it.
Project health	One row per project, worst first. Red: over 25 % of open tasks overdue (at least 3), or a task over 30 days late. Amber: any overdue task, or silent. Green: neither.
Overdue breakdown	Open tasks past their deadline, by how many days late, per project and per person.
Workload	Open project tasks per person: overdue, due in the next 10 working days, due later, no deadline.
People	Per person: tasks closed in the period (vs the one before), on-time %, open and overdue now, QA send-backs on closed tasks, and closed tasks over the last 8 periods.
Activity	Busiest projects of the last 7 days: new tasks, bugs raised, stage moves and comments (ranked by new×2 + bugs×3 + moves + comments). Silent projects below.
All tasks	Every number on this tab opens its tasks here. Edit in place, bulk edit and Excel export work as on the other tabs.

03 Development

Tasks, issues and deadlines

The Development department's tasks and issues. The All / Dev / Issues switch at the top steers every number.

Development, as you see it (names replaced).

Every data point

DATA POINT	WHAT IT SHOWS AND HOW TO USE IT
All, Dev or Issues	Development department only. Dev = development tasks, Issues = bugs and feedback, All = both. Every number on this tab follows this switch.
Total	All tasks in the filters for the switch (Dev, Issues or both), Development department only. Under the number: the split into Dev and Issues (or Bug and Feedback). Click any count to list those tasks below.
Pending	Behind QA Backlog and not on hold: To do, In progress, Pushed to Master, Merged to Development, Pending for QA, Issue Raised. Click any count to list those tasks below.
On hold	In On Hold: neither pending nor completed. Pending + completed + on hold = total.
Ready to deploy	In the Done stage, ready to go live. Then Deployed: in the LIVE stage.

Overdue	Pending, not On Hold, and the deadline has passed. The first number to act on each day.
Done today	Reached QA Backlog for the first time today (IST).
Per person or project	Per person or project. Done = sent to QA (QA Backlog to LIVE). Comp. today = reached QA Backlog today. Switch Assignee / Project at the top. Every count opens its tasks. Click the title to focus it in the centre; drag ⠿ at the top to move it.
Pending vs Done	Pending vs completed (QA Backlog, In QA, Done, LIVE) per person or project, top 15 by total. Tooltip splits Dev / Issues (Bug / Feedback on Issues). Click a bar to open those tasks.
Task ageing	Open tasks by days past deadline. On Hold counts here but not as Overdue. The darker the red, the later. Chart or Table at the top.
On-time ranking	Tasks sent to QA with a deadline. Ranked by on-time %, then average days early. Fewer than 3: not ranked.
Tasks by stage	Tasks per Kanban stage; the colour bar shows each stage total. The red part of a cell is overdue. Click a cell for those tasks.
Task lists	Due today, Overdue, All tasks and Alert details open here. Clicking any number above opens All tasks narrowed to it. In a list: click a cell to change stage, status or tags (and more for leads), tick rows for bulk edit, and export to Excel.

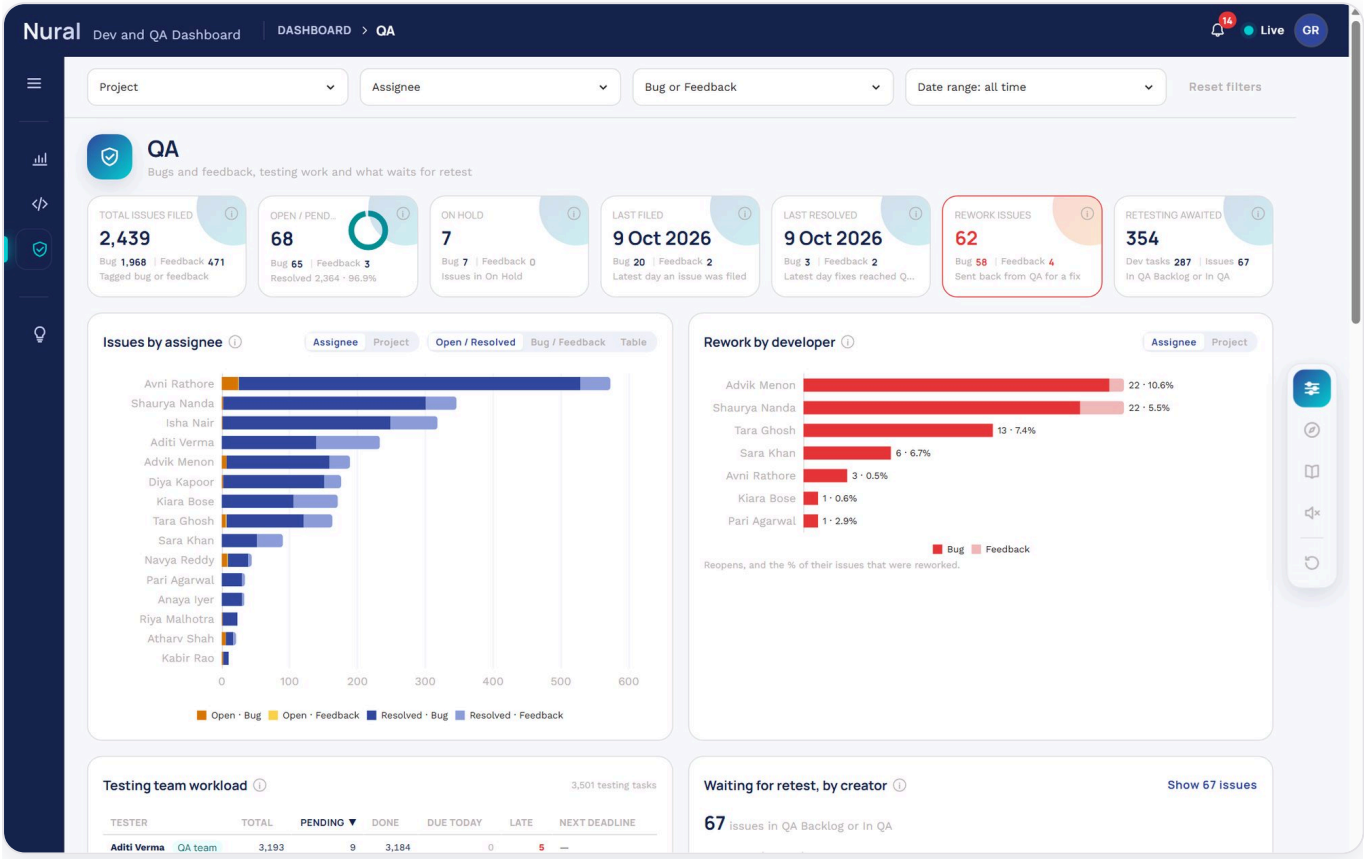

Task lists

Due today, Overdue, All tasks (follows the last number you clicked) and Alert details. Each list sorts, edits in place, bulk edits, pages and exports to Excel.

04 QA

Bugs, feedback, testing and retesting

Bugs and feedback (tasks tagged bug or feedback), testing work and the retest queue. The Bug or Feedback filter narrows the page.

QA, as you see it (names replaced).

Every data point

DATA POINT	WHAT IT SHOWS AND HOW TO USE IT
Issues filed	Every task tagged bug or feedback in the filters, whoever it is assigned to. Bug and Feedback under the number. Click any count to list those tasks below.
Open / pending	Open = pending: any stage behind QA Backlog except On Hold (Issue Raised included). Resolved = QA Backlog, In QA, Done or LIVE. On Hold is its own tile. The ring shows the resolved %.
On hold	In On Hold: neither pending nor completed. Pending + completed + on hold = total.
Last filed and resolved	Latest day an issue was created, and how many that day. Next to it, Last resolved: Latest day issues were pushed to QA Backlog (a fix handed to QA), and how many that day.

Rework	Issues QA sent back after testing: from QA Backlog, In QA or Done to Issue Raised, To do or In progress. Stage flow only.
Retesting awaited	Every task waiting for QA: in QA Backlog or In QA, split into dev tasks and issues (bug or feedback). The QA team's queue.
Issues by person	Open vs resolved, each split into bug and feedback (or the reverse), per person or project. Table: the assignee-wise table. Click the title to focus it in the centre; drag ⠿ at the top to move it.
Rework by developer	QA send-backs per person or project, split into bug and feedback, and the % of their issues sent back. First Issue Raised to To do is not counted.
Testing tasks	Tasks tagged testing or re-testing, or assigned to QA Testing. Late = pending past deadline.
Waiting for retest	Issues in QA Backlog or In QA, by who filed them. Oldest = days waiting.
Retest queue by person	Tasks and issues in QA Backlog and In QA per assignee or project. Every number opens its tasks.
Issue trend	Last 7 days (IST): bugs and feedback filed (created, light) and resolved (pushed to QA Backlog that day, dark). Pick one assignee or project, or see all. Click a point for that day's issues.
Issue ageing	Open issues by days past deadline (same as task ageing). On Hold counts here.
Issues by stage	Issues per stage and person (or project). Red = overdue part. Bug / Feedback narrows it.
Issue lists	Latest filed, Latest resolved and All issues. Any number above opens All issues narrowed to it. Edit in place, bulk edit and Excel export work as on Development.

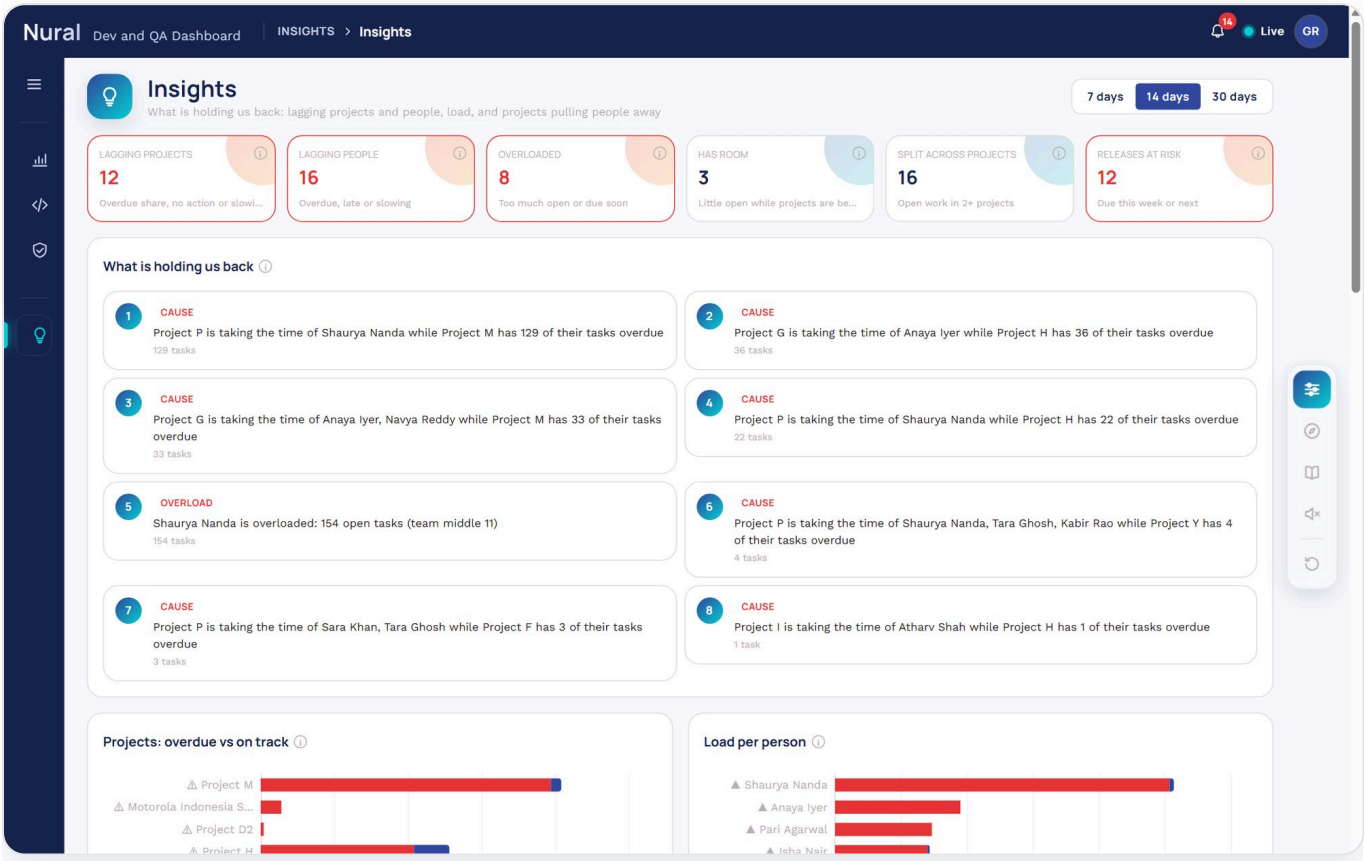

Issue lists

Latest filed, Latest resolved and All issues (follows the last number you clicked), with the same editing and export as on Development.

05 Insights

What is holding us back

Findings from Bitrix24 and dashboard data, ranked: causes first (projects pulling people away), then releases at risk, lagging projects, overload, lagging people and people with room. Period: 7, 14 or 30 days. Every finding opens its tasks.

Insights, as you see it (names replaced).

Every data point

DATA POINT	WHAT IT SHOWS AND HOW TO USE IT
Insights	What is holding us back, worked out from Bitrix24 data: lagging projects and people, load, projects pulling people away and releases at risk. Choose how far back to look: 7, 14 or 30 days.
At a glance	Lagging projects and people, the overloaded, those with room to help, people split across projects and releases at risk. Click a tile for its tasks.
What is holding us back	The findings ranked, causes first: a project taking people's time while another project's tasks go overdue, then lagging projects and people, overload, people with room and risky releases. Click one for its tasks.
Projects	Open tasks per project with the overdue part; ⚠ marks a lagging project. Hover for why; click for the tasks.

Load	Open tasks per person: overdue, due in the next 5 working days and the rest. ▲ overloaded, ▽ has room to take tasks over.
Projects pulling people away	Who has open work in several projects, how much they do in each, and which project is taking their time while another goes overdue.
Release plan	Tasks due this week and next with their planned date, stage and risk of slipping. Click a row for the task.
Leave and attendance	From Infowan once connected: leave, late arrivals and early leaving, and the tasks and projects they put at risk. Until then insights use Bitrix24 data.

The rules

FINDING	RULE
Lagging project	3+ overdue and 25 % or more of its open tasks; or no action for 10+ working days; or closing half or less of the period before.
Lagging person	3+ overdue and 30 % or more of their open tasks; or under 50 % on time; or closing half or less of the period before with 5+ open.
Overloaded	10+ open and twice the team median, or 8+ due in the next 5 working days.
Has room	2 or fewer open and closed while one of their projects has overdue work.
Pulling people away	One project takes 70 % or more of a person's actions while their tasks in another project are overdue.
Release risk	Open tasks due this week or next: high if overdue, or not started and due within 2 working days.

06

Definitions

The rules behind the numbers

TERM	RULE
Pending	Behind QA Backlog and not on hold: To do, In progress, Pushed to Master, Merged to Development, Pending for QA, Issue Raised.
On hold	In On Hold: neither pending nor completed. Pending + completed + on hold = total.
Completed (done)	Completed: in QA Backlog, In QA, Done or LIVE.
Overdue	Pending, not On Hold, and the deadline has passed.
Done today	Reached QA Backlog for the first time today (IST).
Due today	Deadline is today (IST), in any stage except LIVE.
Rework	Issues QA sent back after testing: from QA Backlog, In QA or Done to Issue Raised, To do or In progress. Stage flow only.
Retesting awaited	Every task waiting for QA: in QA Backlog or In QA, split into dev tasks and issues (bug or feedback).
Closed (KPI)	Tasks closed in the period (first QA Backlog, else the Bitrix24 closed date). Clean-ups of 30+ tasks closed in one project on one day are left out.
On-time (KPI)	Of the tasks closed in the period that had a deadline, the share closed on or before it.
Working time	Working time: Monday to Friday, 09:30 to 18:30 IST, public holidays excluded.
