# 01 Daily update

Plan, wrap up, post to Slack

Your morning plan and evening wrap-up, opened from the Daily update icon in the page tools and posted to the daily work update group on Slack. The page lists your last 30 days.

## Every data point

| DATA POINT | WHAT IT SHOWS AND HOW TO USE IT |
|---|---|
| **Plan your day** | Open it from the Daily update icon in the dock: it lists your overdue and due-today tasks. Keep, remove or add your own tasks, write a note and post it: it goes to the daily work update group on Slack with your name. |
| **Wrap up your day** | In the evening from the same icon, or when you sign out, your plan comes back with each task Done or WIP. Marking one Done completes it in Bitrix24; work outside the plan becomes a Bitrix24 task assigned to you. Then it goes to the same Slack thread. |
| **My last 30 days** | Each day you posted: tasks planned, done, WIP and outside the plan. Open the Daily update any time from its icon in the dock on the right. |
