01 Daily update

Plan, wrap up, post to Slack

Your morning plan and evening wrap-up, opened from the Daily update icon in the page tools and posted to the daily work update group on Slack. The page lists your last 30 days.

Every data point

DATA POINT	WHAT IT SHOWS AND HOW TO USE IT
Plan your day	Open it from the Daily update icon in the dock: it lists your overdue and due-today tasks. Keep, remove or add your own tasks, write a note and post it: it goes to the daily work update group on Slack with your name.
Wrap up your day	In the evening from the same icon, or when you sign out, your plan comes back with each task Done or WIP. Marking one Done completes it in Bitrix24; work outside the plan becomes a Bitrix24 task assigned to you. Then it goes to the same Slack thread.
My last 30 days	Each day you posted: tasks planned, done, WIP and outside the plan. Open the Daily update any time from its icon in the dock on the right.
