# 01 On every page

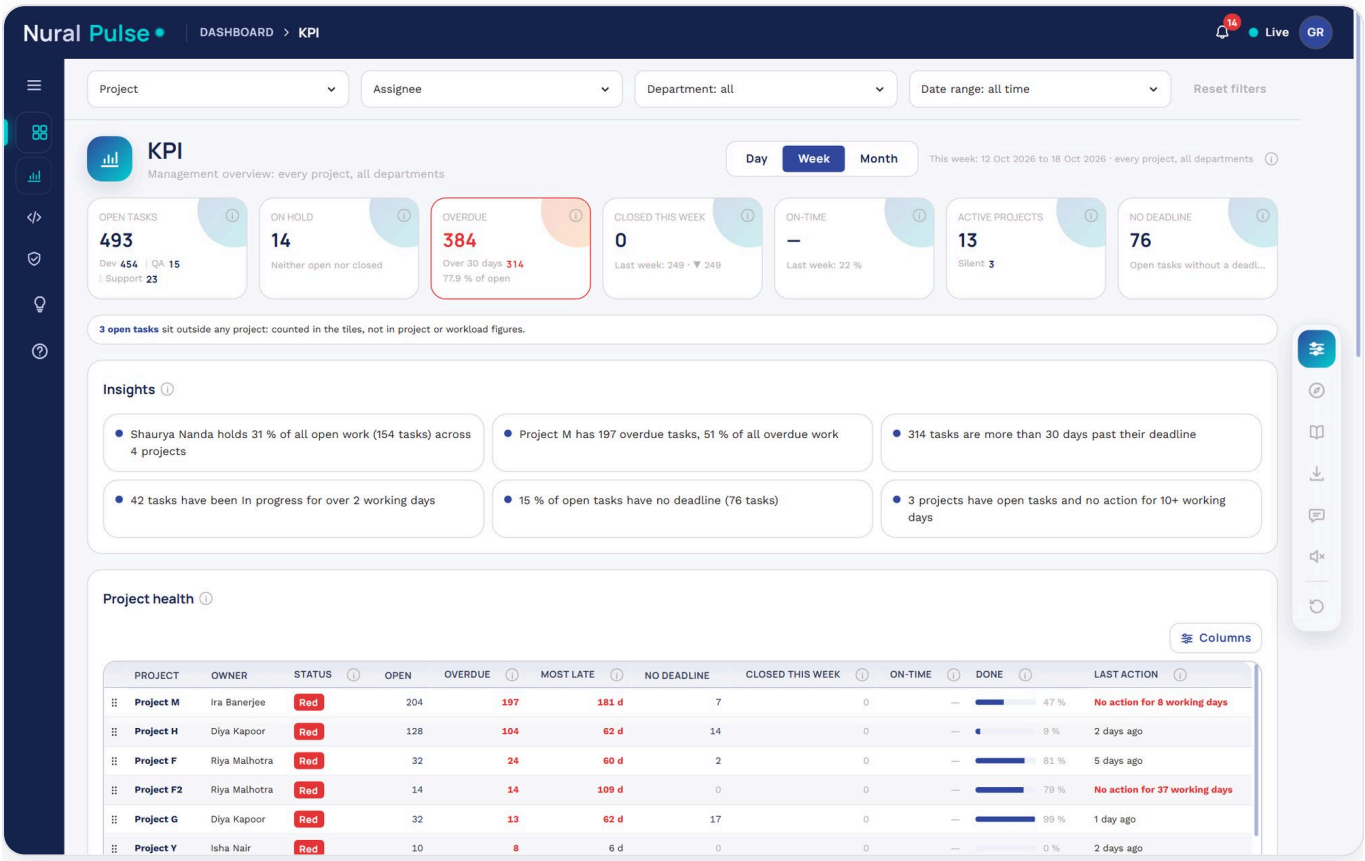

The parts every page shares

| PART | WHAT IT DOES |
| --- | --- |
| **One number, two places** | The same data point can show a different number on two pages, because each counts within its own department or group: Development counts the Development department, QA the bugs and feedback, KPI the whole company, Insights the period you chose. Click any number to see exactly which tasks it counts. |
| **The menu** | Every page, by module (Dashboard, Insights, Employees, Integration). The module of the page you are on is highlighted and open; click another module to open it. Drag ⠿ to put modules in your order, and pages within their own module. Hover the icons to open the menu; click ☰ to pin it open. |
| **Filters** | Project, assignee, tag and date range narrow every number on the tab. Reset filters clears them. The "i" icons say exactly what each number counts. |
| **Alerts** | The bell counts overdue tasks and tasks stuck over 5 days in one stage. Click it for the list and jump to the tasks. |
| **Live** | Live means changes in Bitrix24 reach the dashboard within seconds; numbers refresh by themselves. Offline means the connection dropped and it is reconnecting. |
| **Page tools** | On the right: Customise (choose the tiles and cards to show), the guided tour of this page, the PDF guides, Export page (every data point on the page as one Excel workbook or PDF), reading tours aloud, and resetting the layout. Hover any icon for its name. Each data point also has a small toolbar on hover: ⠿ to move it, ? to explain it, the eye to hide it. Tables have Columns (choose and order them) and ⠿ on each row to put rows in your own order. |
| **Your profile** | Your name and role, the theme (Light, Dark, System), live-update toasts, Reset layout, this tour (replay, voice on or off) and Sign out. You are signed out 3 days after signing in. |

# 02 KPI

Management overview

The management overview of every project and department. Period: Day, Week or Month; "closed" and "on-time" compare with the period before.

KPI, as you see it (names replaced).

## Every data point

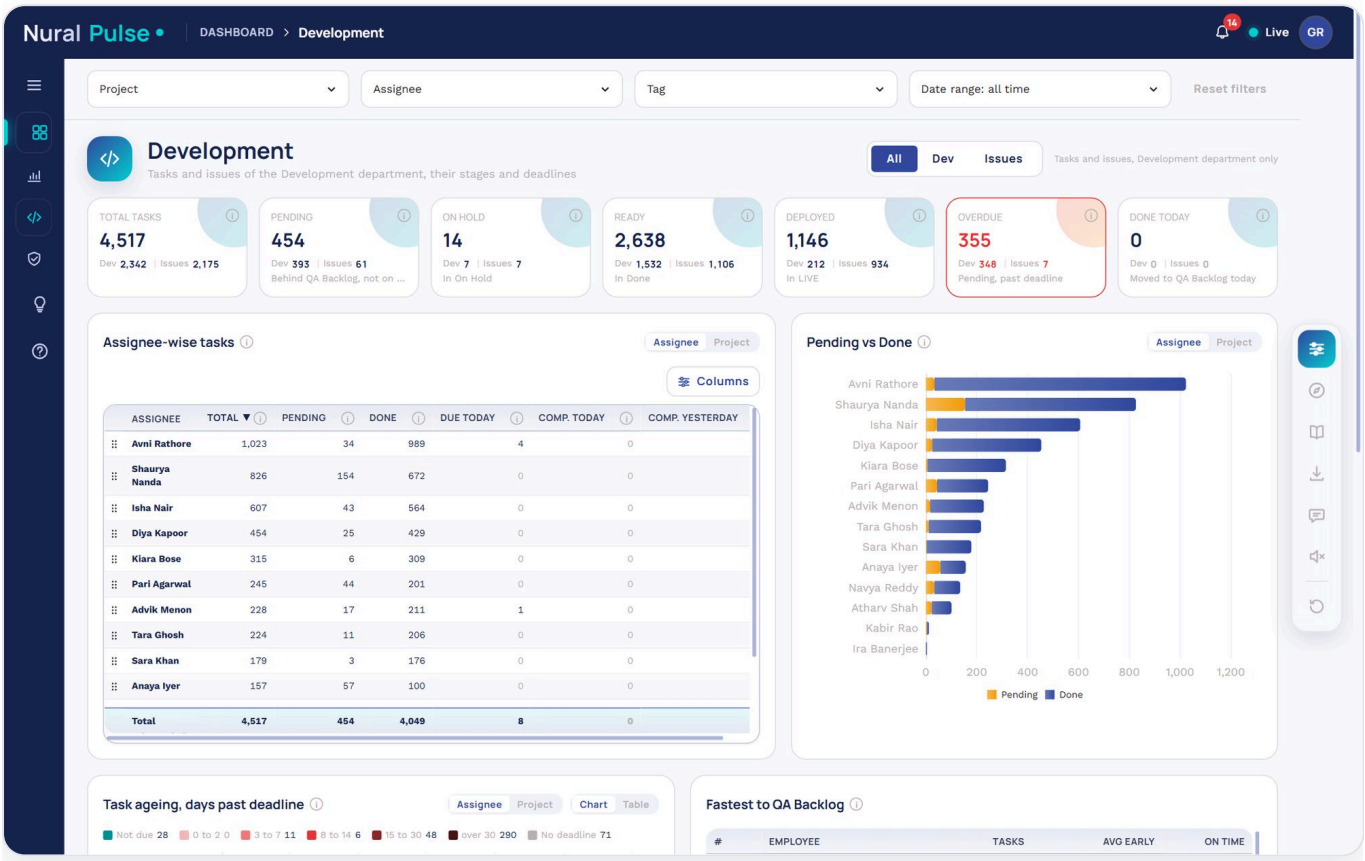

| DATA POINT | WHAT IT SHOWS AND HOW TO USE IT |
|---|---|
| **Day, Week or Month** | The period changes only the glowing data points: Closed, On-time, Project health (closed in the period) and People (delivered in the period), each compared with the period before. Open, On hold, Overdue, Active projects and No deadline are counted as of now, whatever the period. Every task in every project, all departments. A task is closed when it first reaches QA Backlog (or, without QA stages, when Bitrix24 closes it). |
| **Open tasks** | Pending tasks: behind QA Backlog and not on hold. Department = the assignee's department. Click any count to list those tasks below. |
| **Overdue** | Open tasks whose deadline has passed. "Over 30 days" = more than 30 days late. |

| | |
|---|---|
| **Closed** | Tasks closed in the period (first QA Backlog, else the Bitrix24 closed date). Clean-ups of 30+ tasks closed in one project on one day are left out. |
| **On-time** | Of the tasks closed in the period that had a deadline, the share closed on or before it. |
| **Active projects** | Projects with open tasks and any action (task change or comment) in the last 30 days. Silent = open tasks and no action for 10+ working days. |
| **No deadline** | Open tasks without a deadline: they cannot be overdue or planned. |
| **Insights** | Findings worked out from the same numbers. Click one to see its tasks. Start here each morning. Click the title to focus it in the centre; drag ⠿ at the top to move it. |
| **Project health** | One row per project, worst first. Red: over 25 % of open tasks overdue (at least 3), or a task over 30 days late. Amber: any overdue task, or silent. Green: neither. |
| **Overdue breakdown** | Open tasks past their deadline, by how many days late, per project and per person. |
| **Workload** | Open project tasks per person: overdue, due in the next 10 working days, due later, no deadline. |
| **People** | Per person: tasks closed in the period (vs the one before), on-time %, open and overdue now, QA send-backs on closed tasks, and closed tasks over the last 8 periods. |
| **Activity** | Busiest projects of the last 7 days: new tasks, bugs raised, stage moves and comments (ranked by new×2 + bugs×3 + moves + comments). Silent projects below. |
| **All tasks** | Every number on this tab opens its tasks here. Edit in place, bulk edit and Excel export work as on the other tabs. |

# 03 Development

Tasks, issues and deadlines

The Development department's tasks and issues. The All / Dev / Issues switch at the top steers every number.

Development, as you see it (names replaced).

## Every data point

| DATA POINT | WHAT IT SHOWS AND HOW TO USE IT |
|---|---|
| **All, Dev or Issues** | Development department only. Dev = development tasks, Issues = bugs and feedback, All = both. It changes every tile, card and list on this page (they glow now). |
| **Total** | All tasks in the filters for the switch (Dev, Issues or both), Development department only. Under the number: the split into Dev and Issues (or Bug and Feedback). Click any count to list those tasks below. |
| **Pending** | Behind QA Backlog and not on hold: To do, In progress, Pushed to Master, Merged to Development, Pending for QA, Issue Raised. Click any count to list those tasks below. |
| **On hold** | In On Hold: neither pending nor completed. Pending + completed + on hold = total. |

| | |
|---|---|
| **Ready to deploy** | In the Done stage, ready to go live. Then Deployed: in the LIVE stage. |
| **Overdue** | Pending, not On Hold, and the deadline has passed. The first number to act on each day. |
| **Done today** | Reached QA Backlog for the first time today (IST). |
| **Per person or project** | Per person or project. Done = sent to QA (QA Backlog to LIVE). Comp. today = reached QA Backlog today. Switch Assignee / Project at the top. Every count opens its tasks. Click the title to focus it in the centre; drag ⠿ at the top to move it. |
| **Pending vs Done** | Pending vs completed (QA Backlog, In QA, Done, LIVE) per person or project, top 15 by total. Tooltip splits Dev / Issues (Bug / Feedback on Issues). Click a bar to open those tasks. |
| **Task ageing** | Open tasks by days past deadline. On Hold counts here but not as Overdue. The darker the red, the later. Chart or Table at the top. |
| **On-time ranking** | Tasks sent to QA with a deadline. Ranked by on-time %, then average days early. Fewer than 3: not ranked. |
| **Tasks by stage** | Tasks per Kanban stage; the colour bar shows each stage total. The red part of a cell is overdue. Click a cell for those tasks. |
| **Task lists** | Due today, Overdue, All tasks and Alert details open here. Clicking any number above opens All tasks narrowed to it. In a list: click a cell to change stage, status or tags (and more for leads), tick rows for bulk edit, and export to Excel. |

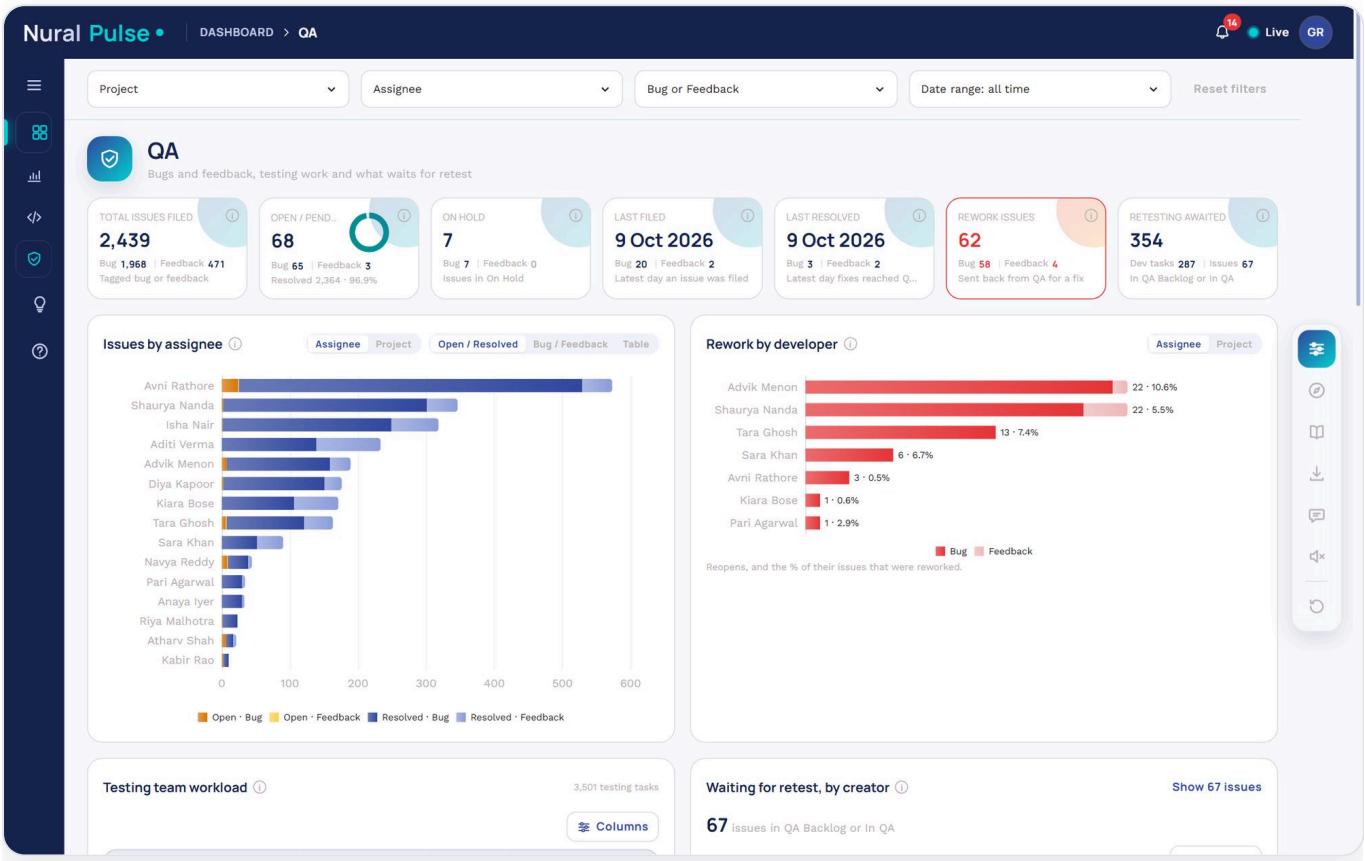

## Task lists

Due today, Overdue, All tasks (follows the last number you clicked) and Alert details. Each list sorts, edits in place, bulk edits, pages and exports to Excel.

# 04 QA

Bugs, feedback, testing and retesting

Bugs and feedback (tasks tagged bug or feedback), testing work and the retest queue. The Bug or Feedback filter narrows the page.

QA, as you see it (names replaced).

## Every data point

| DATA POINT | WHAT IT SHOWS AND HOW TO USE IT |
|---|---|
| **Issues filed** | Every task tagged bug or feedback in the filters, whoever it is assigned to. Bug and Feedback under the number. Click any count to list those tasks below. |
| **Open / pending** | Open = pending: any stage behind QA Backlog except On Hold (Issue Raised included). Resolved = QA Backlog, In QA, Done or LIVE. On Hold is its own tile. The ring shows the resolved %. |
| **On hold** | In On Hold: neither pending nor completed. Pending + completed + on hold = total. |
| **Last filed and resolved** | Latest day an issue was created, and how many that day. Next to it, Last resolved: Latest day issues were pushed to QA Backlog (a fix handed to QA), and how many that day. |

| | |
|---|---|
| **Rework** | Issues QA sent back after testing: from QA Backlog, In QA or Done to Issue Raised, To do or In progress. Stage flow only. |
| **Retesting awaited** | Every task waiting for QA: in QA Backlog or In QA, split into dev tasks and issues (bug or feedback). The QA team's queue. |
| **Issues by person** | Open vs resolved, each split into bug and feedback (or the reverse), per person or project. Table: the assignee-wise table. Click the title to focus it in the centre; drag ⠿ at the top to move it. |
| **Rework by developer** | QA send-backs per person or project, split into bug and feedback, and the % of their issues sent back. First Issue Raised to To do is not counted. |
| **Testing tasks** | Tasks tagged testing or re-testing, or assigned to QA Testing. Late = pending past deadline. |
| **Waiting for retest** | Issues in QA Backlog or In QA, by who filed them. Oldest = days waiting. |
| **Retest queue by person** | Tasks and issues in QA Backlog and In QA per assignee or project. Every number opens its tasks. |
| **Issue trend** | Last 7 days (IST): bugs and feedback filed (created, light) and resolved (pushed to QA Backlog that day, dark). Pick one assignee or project, or see all. Click a point for that day's issues. |
| **Issue ageing** | Open issues by days past deadline (same as task ageing). On Hold counts here. |
| **Issues by stage** | Issues per stage and person (or project). Red = overdue part. Bug / Feedback narrows it. |
| **Issue lists** | Latest filed, Latest resolved and All issues. Any number above opens All issues narrowed to it. Edit in place, bulk edit and Excel export work as on Development. |

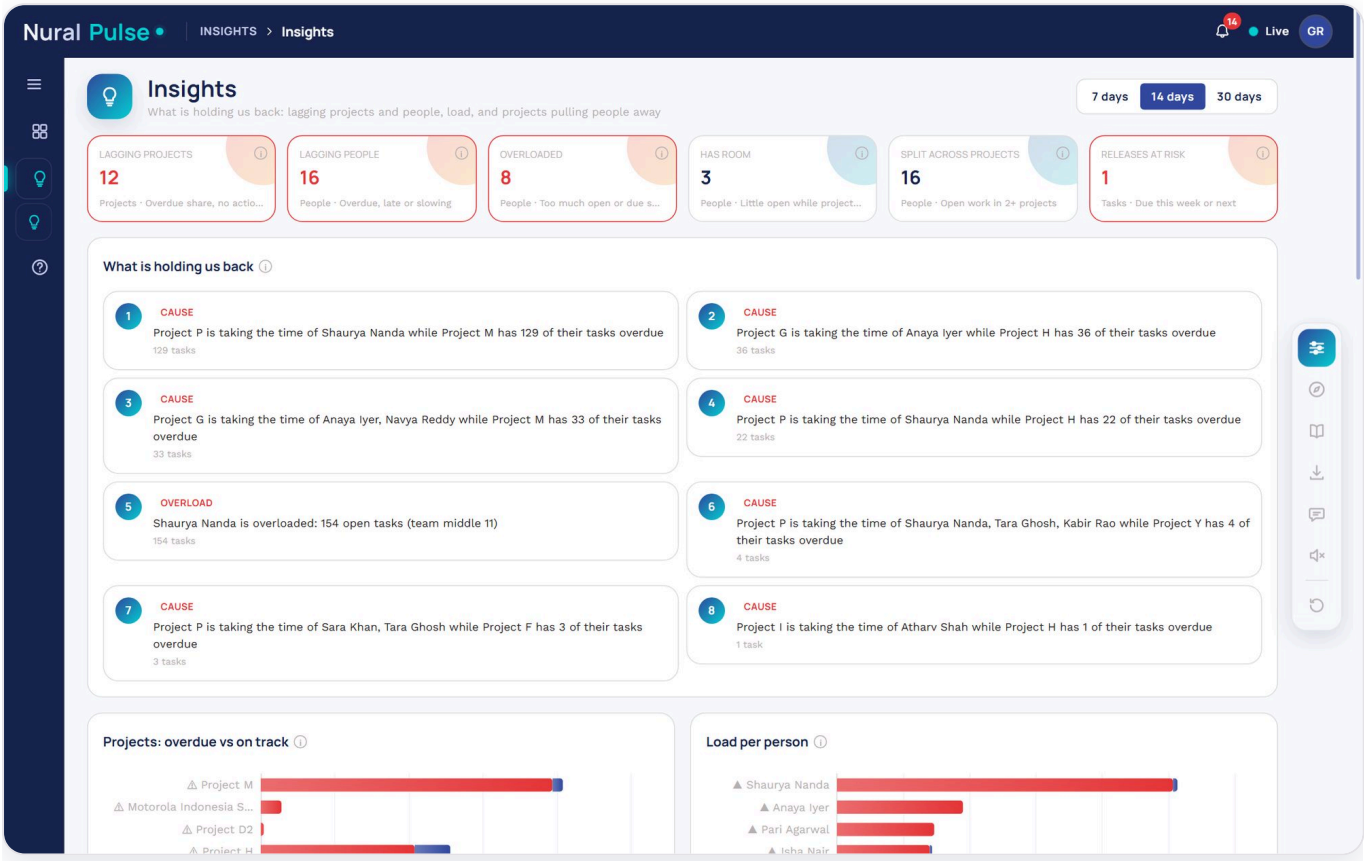

## Issue lists

Latest filed, Latest resolved and All issues (follows the last number you clicked), with the same editing and export as on Development.

# 05 Insights

What is holding us back

Findings from Bitrix24 and dashboard data, ranked: causes first (projects pulling people away), then releases at risk, lagging projects, overload, lagging people and people with room. Period: 7, 14 or 30 days. Every finding opens its tasks.

Insights, as you see it (names replaced).

## Every data point

| DATA POINT | WHAT IT SHOWS AND HOW TO USE IT |
|---|---|
| **Insights** | What is holding us back, worked out from Bitrix24 data. 7, 14 or 30 days sets how far back activity is looked at: it changes the glowing data points (lagging projects and people, has room, the findings, projects, load and pulls). Overload, people split across projects and the release plan are counted as of now. |
| **At a glance** | Lagging projects and people, the overloaded, those with room to help, people split across projects and releases at risk. Click a tile for the projects or people it counts, with why each is there; click one of them for its tasks. |
| **What is holding us back** | The findings ranked, causes first: a project taking people's time while another project's tasks go overdue, then lagging projects and people, overload, people with room and risky releases. Click one for its tasks. |

| | |
|---|---|
| **Projects** | Open tasks per project with the overdue part; ⚠ marks a lagging project. Hover for why; click for the tasks. |
| **Load** | Open tasks per person: overdue, due in the next 5 working days and the rest. ▲ overloaded, ▽ has room to take tasks over. |
| **Projects pulling people away** | Who has open work in several projects, how much they do in each, and which project is taking their time while another goes overdue. |
| **Release plan** | Tasks due this week and next with their planned date, stage and risk of slipping. Click a row for the task. |
| **Leave and attendance** | From Infowan once connected: leave, late arrivals and early leaving, and the tasks and projects they put at risk. Until then insights use Bitrix24 data. |

## The rules

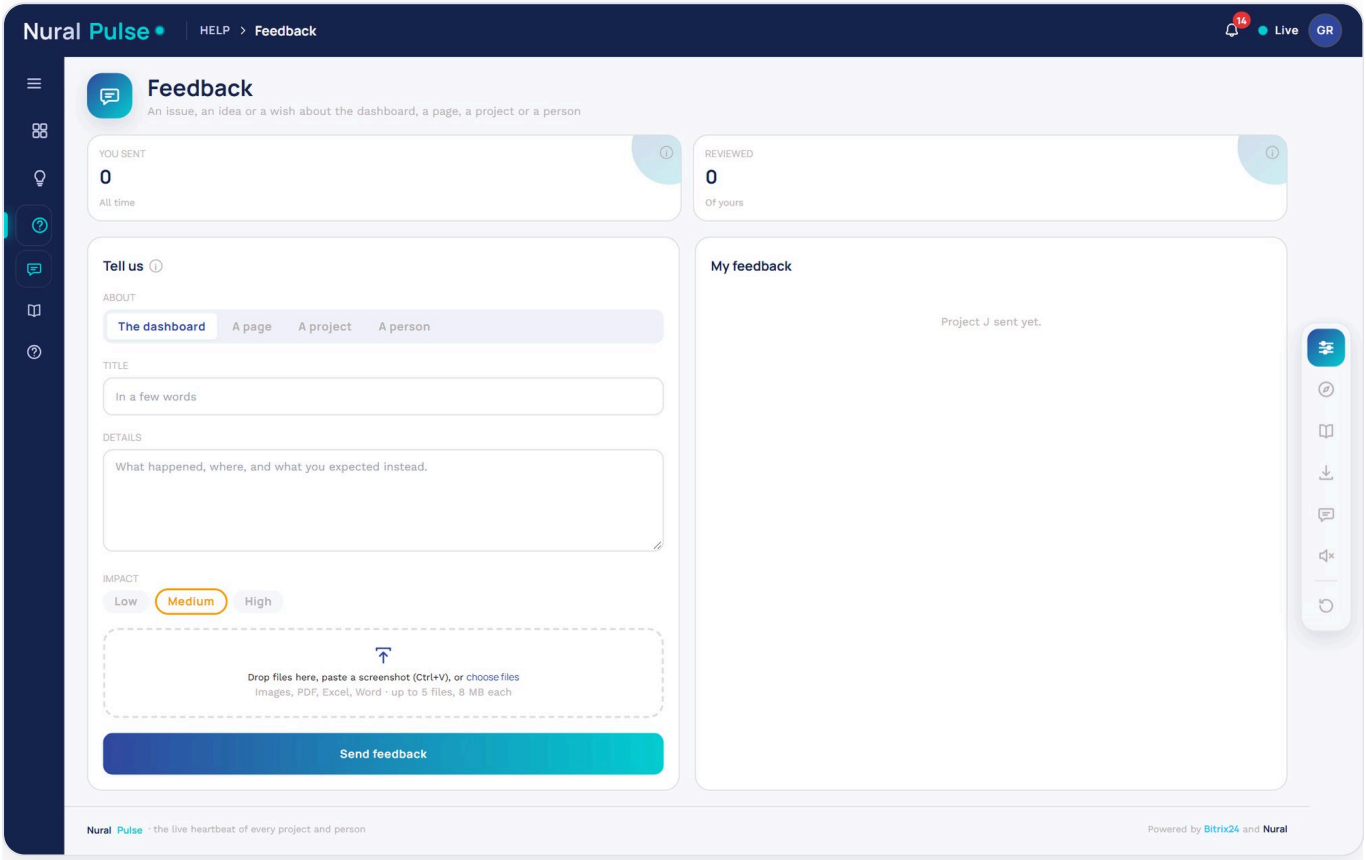

| FINDING | RULE |
|---|---|
| **Lagging project** | 3+ overdue and 25 % or more of its open tasks; or no action for 10+ working days; or closing half or less of the period before. |
| **Lagging person** | 3+ overdue and 30 % or more of their open tasks; or under 50 % on time; or closing half or less of the period before with 5+ open. |
| **Overloaded** | 10+ open and twice the team median, or 8+ due in the next 5 working days. |
| **Has room** | 2 or fewer open and closed while one of their projects has overdue work. |
| **Pulling people away** | One project takes 70 % or more of a person's actions while their tasks in another project are overdue. |
| **Release risk** | Open tasks due this week or next: high if overdue, or not started and due within 2 working days. |

06

# Feedback

Issues and ideas, with attachments

Send feedback about the dashboard, a page, a project or a person (only those you can see), with up to 5 attachments of 8 MB: images (paste a screenshot with Ctrl+V), PDF, Excel, Word. My feedback shows what you sent and the reply. The Feedback inbox (admins, PM and team leads) reads everyone's, replies and exports to Excel.

Feedback, as you see it (names replaced).

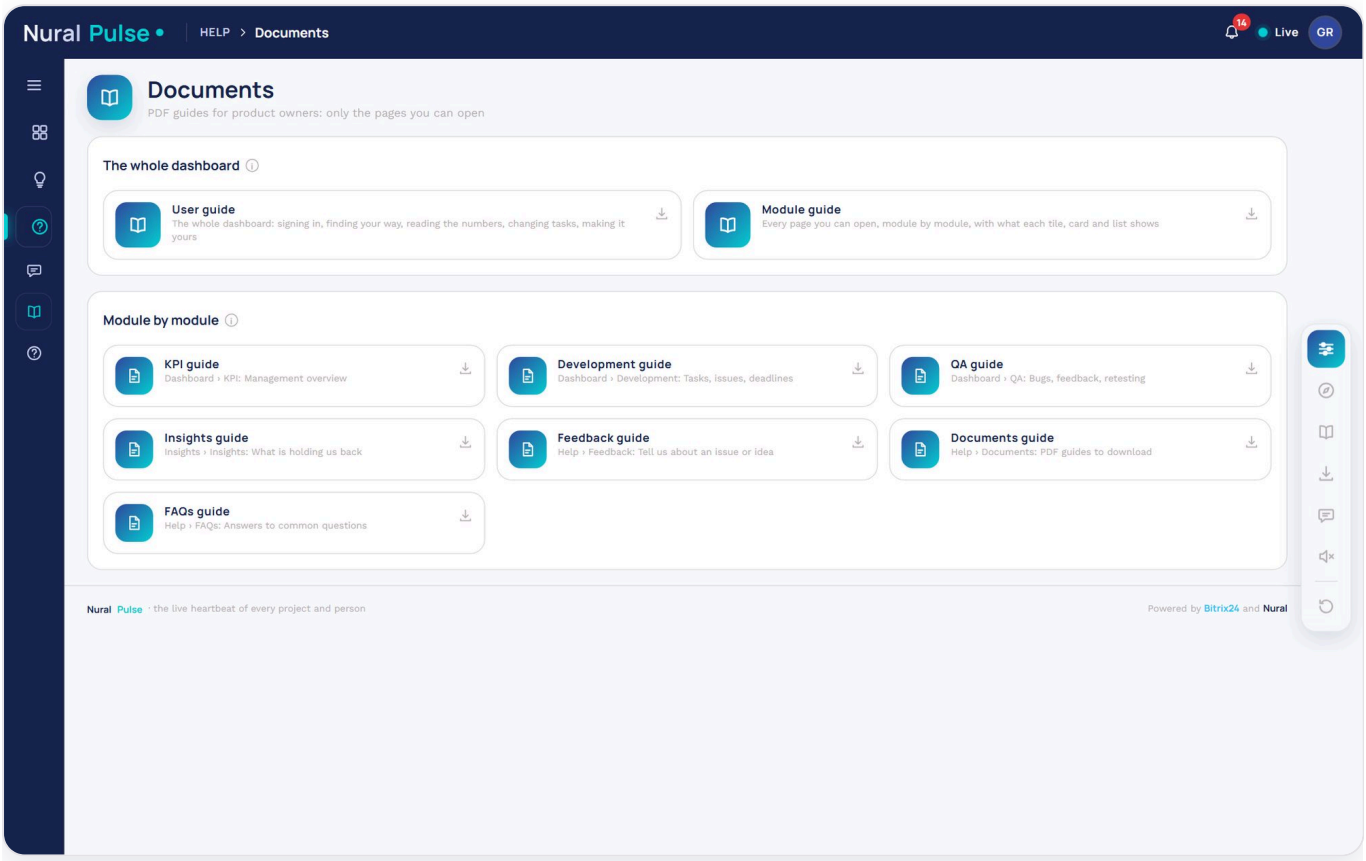

## Every data point

| DATA POINT | WHAT IT SHOWS AND HOW TO USE IT |
|---|---|
| **Tell us** | An issue, an idea or a wish: about the dashboard, a page, a project or a person (only the ones you can see). Add screenshots (paste them with Ctrl+V), PDF, Excel or Word files, up to 5. |
| **My feedback** | What you sent, whether it has been reviewed, and the reply. |

# 07 Documents

The PDF guides

The guides for your level of access: the whole dashboard (User guide, Module guide) and one short guide per page you can open.

Documents, as you see it (names replaced).

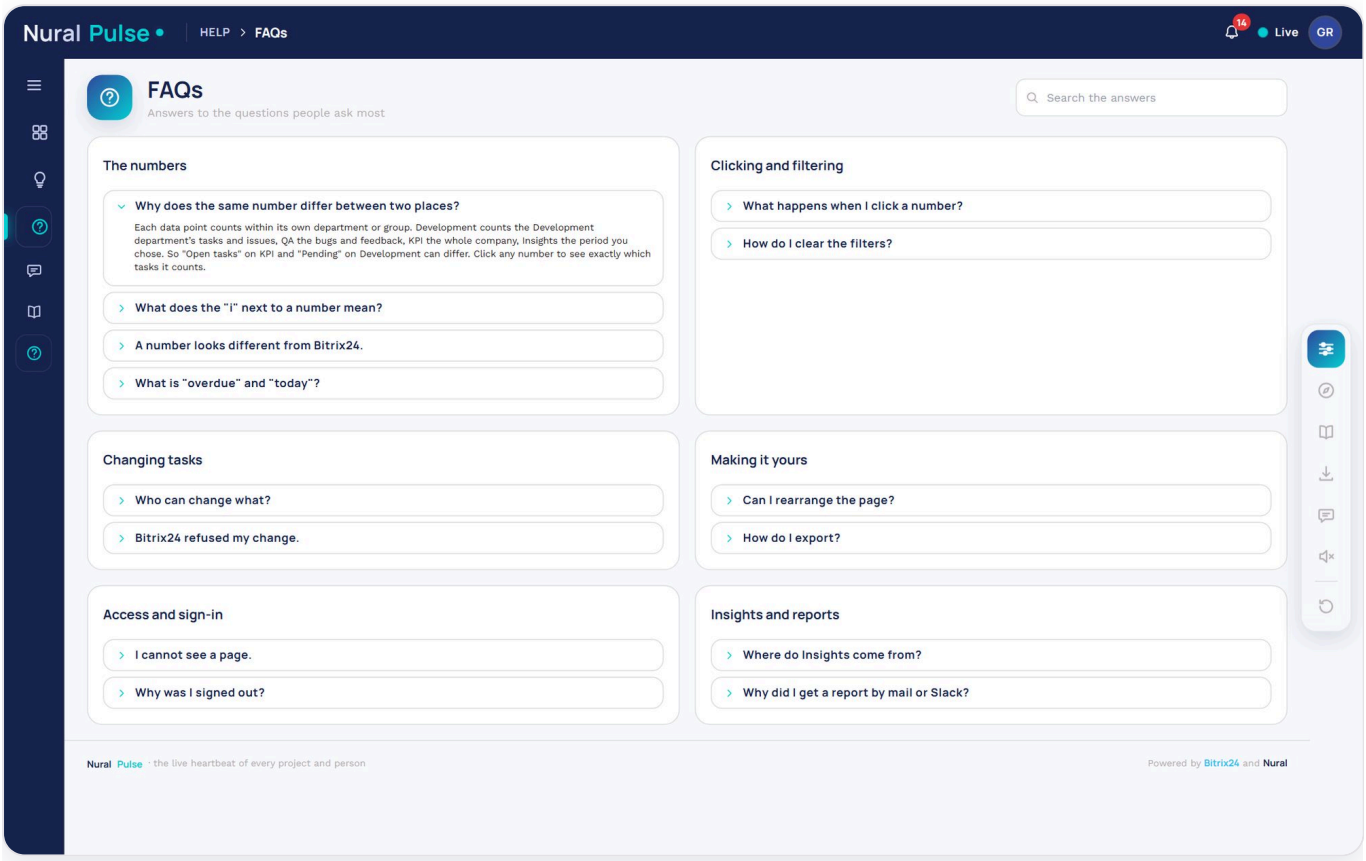

## Every data point

| DATA POINT | WHAT IT SHOWS AND HOW TO USE IT |
|---|---|
| **Guides** | PDF guides for your level of access: the whole dashboard, and module by module. Only the pages you can open are in them. |

# 08 FAQs

Common questions

Answers by topic: the numbers, clicking and filtering, changing tasks, making it yours, access and sign-in, Insights and reports. Search at the top.

FAQs, as you see it (names replaced).

## Every data point

| DATA POINT | WHAT IT SHOWS AND HOW TO USE IT |
|---|---|
| **FAQs** | Answers to the questions people ask most, by topic. Search at the top. |

09

# Definitions

The rules behind the numbers

| TERM | RULE |
| --- | --- |
| **Pending** | Behind QA Backlog and not on hold: To do, In progress, Pushed to Master, Merged to Development, Pending for QA, Issue Raised. |
| **On hold** | In On Hold: neither pending nor completed. Pending + completed + on hold = total. |
| **Completed (done)** | Completed: in QA Backlog, In QA, Done or LIVE. |
| **Overdue** | Pending, not On Hold, and the deadline has passed. |
| **Done today** | Reached QA Backlog for the first time today (IST). |
| **Due today** | Deadline is today (IST), in any stage except LIVE. |
| **Rework** | Issues QA sent back after testing: from QA Backlog, In QA or Done to Issue Raised, To do or In progress. Stage flow only. |
| **Retesting awaited** | Every task waiting for QA: in QA Backlog or In QA, split into dev tasks and issues (bug or feedback). |
| **Closed (KPI)** | Tasks closed in the period (first QA Backlog, else the Bitrix24 closed date). Clean-ups of 30+ tasks closed in one project on one day are left out. |
| **On-time (KPI)** | Of the tasks closed in the period that had a deadline, the share closed on or before it. |
| **Working time** | Working time: Monday to Friday, 09:30 to 18:30 IST, public holidays excluded. |
